a poor report for the past year. The principal cause is the great decline of business in Hongkong. Our Amoy branch has done exceeding! on Mr. Hunter, our Manager at that port. The wealth of the island is in his possession, and he business there shows a very material increase over that of 1803, whilst we regret the falling off here is very great. Mr. Joy, our Genera M magor, cannot very well explain the heavy loss made here; he attributes it principally to the Morphia Ordinance, to the many oppositions now existing, and to the low exchange which has ruled throughout the year. However, we not think these causes can account for further decline of our business during been landed in consequence of the heatility of first four months of this year. We have our the repel leaders towards the residents. The tainly during 1894 had many difficulties to contend with. He is neither British German, American, nor Russian. but he has been professionally associated with Vi cercy Chang Chih-tung for some time past, and monger's idea was to induce his country, a petty state of Northern Europe, to recognize the new Republic, and so give it a legal status; but the parsimony or impecunicalty of Chang apparently frustrated that bold design. The foreigner wished to send a long telegraphic despatch, explaining the whole situation, to a leading international lawyer in Paris, to get his opinion upon the status of a republic organised as Formose was; but Chang haggled about the cost of the tologram, and wanted to send it over the Chinese and Russian lines, by way of Helampo. The dis organised and disrupted state of the Chinese Tele graphic Administration, however, rendered this plan futile, and so the despatch was never sent. and the opinion of the eminent French jurist was never obtained. In its absence it was found impossible to seeme the support of the European state to which the originator of the idea owed allegiance, and which was promised certain commercial advantages for its countenance if the scheme had been successfully carried through The whole grand plan then resolved itself into an ugly abortion, and it will cost bina a pretty penny before she is finished with it, because it is proved, by the most convincing evidence, that the Chinese Government is solely responsible for the condition in which the Japanese found the island, and the rast expense to which they have We may observe that the defiant attitude of the

Had his property been wholly situated in the island, he would probably have remained quiet and become a naturalised subject of Japan. Bu on the mainland of China also he has possessions even more valuable than those in Fermoss, so that a change of nationality would seriously mpair his interests. Under these circumstances, he is evidently placed in a serious dilemma. In order to save his property on the mainland, he cannot become a Japanese subject. He must therefore dispose of his property in Formosa within two years and leave the island, for Japanese lew does not sanction the possession o real estate by foreigners. The difficulties of his eitestion are duly appreciated by the Viceroy Li. who, we are informed, brought the matter to the notice of Count Ito and Viscount Muten at Shimonoseki when the question of the cession of the island was under disoussion. Chinese Plenipotentiary asked for a special perty in Formosa after its transfer to Japan. without becoming the latter's subject. This seins to have been driven to his present course out of desperation. The Black Flags, on the part of the people may cost Japan a few millions sterling at 5 per cent., Mesers. Rothslives and some money, but it will prove a good thing that Liu and his dependents have revolted; for the troublesome question about the disposal of his property will be very easily settled once for all. The affair will also serve as a means of ridding the island of all undesirable characters.

Shanghal, 10th June. Information of a very serious duture was repeived at Shanghat Lite on Saturday evening by telegram from Hankow. As we mention d in Friday's issue over a dozen telegrams, official and otherwise, were dispatched during last week to the outraged missionaries, who are supposed to be protected in the yamens at Chengtu, and as no replies were received it was thought the delay was caused by the tensporary interruption of the telegraph wires between lobung and Hankow. The telegram which arrived on Saturday evening shows the cause to be of a very serious nature. It appears the telegrams sent from Shanghai were stopped at an intermediate station by order of the Viceroy, who feared if the mibitance of the telegrams or their delivery became known, the populace were in such a condition that riots would immediately break out at Kiukiang, Hankow, and other places up river. The situation of the foreigners up river is therefore critical

SOME NOTES ON THE CHINESE LOAN.

The French and Bussian Ministers had an audience with the Emperor to-day and returned thanks for the Imperial gifts to the Emperor of Russia. The Emperor expressed his gratitude for the aid that both Powers had rendered him in the retrocession of Liaotung.

The outcome of the Imperial and once seems have been that China has fallen into the trap, and. accepted the offer of Russia to guarantee a loan of 100 million taels. This loan is reported to rank as a first charge on the Customs, the engagements of the Government with regard to previous loans notwithstanding. China has, in fact, committed a deliberate breach of trust, and it is difficult to see how the remainder of the indemnity is to be arranged for. This is seemingly the first fruits of the appointment of the new Financial Foard at Peking of which we had to speak the other day. The feeling is paramount that the end of icence to Liu anthorizing him to own real pro- the dynasty has come, and that it is now only a matter of the devil taking the hindmost, Such is the most favourable view we can take of the

In return for this guarantee, Russia obtains substantial advantages in the oes ion of territory for the new Siberian railway, which will then be enabled to run direct to Viadivortook through Heilungkiang and Kirin territory. This change in the geography of Eastern Asia is of further reaching importance than any that has taken place since 1860, when

Paris, 12th May. The negotiations as to the Cumese loan stand thus Gormany has formed, under the direction day. of M. Hanssman, manager of the Disconti Gesellschaft, a powerful group which is inclined to issue the loan, but on the condition that the guarantees - the Customs and other receiptsare under the control of a European commission. The Gavernments inforested in effecting peace will probably agree to the loan, being issued in equal shares by Germany. France. Russia, and England. The great Paris -ca. tablishments have come to an agric ent order to offer a stronger front to competitors and to claim for France a share equal to other nations. They met vesterday morning at the Complair d'Escompte instead of at the Foreign Office. The loan, it is said, will be for £50,000,000 at starting, followed by successive issue at intervals to be agreed on so as to prevent the market from being swamped by a single loan. China herself is understood not to be desirous of paying off the indemnity at too early a date. She even wishes the Japanese forces which are to remain on her territory till the completion of the payment not to withdraw too soon, so as to give her time to reconstilute her forces in case of any attempt by the Black Flags or others to excite disturbances.

LONDON, 14th May, Great interest is taken in the negotiations now going on with reference to the first issue of the Chinese Indemnity Loan. Very large amounts are spoken of ou the Continent, but, from wha we hear, the sum to be offered at an early date is not likely to exceed £20,000,000, and will probably be less: The rate of interest will be 6 per cent. we believe. Rumours are also current that negotiations are in progress regarding a contract for a railway from Cauton to Peking. This report may very likely be true, but we cannot obtain confirmation of it.

THE EXPANSION OF TELEGRAMS. The following appears in the Times of the 15th

May:

In our issue of the Sth of February last we published, on the authority of the Central News. rather more than 500 words from what purported whom 145 were British. This percentage is very to be a tel gram of over 650 words, dated Wei- low. baiwel via Talienwan, February 5th. Out attention baving been drawn to the matter by an article in the Kobe Chronicle professing to give the original source of this telegram, we have invited the Central News to give an explanation on the subject. In reply they state: - We had 204 words in reference to Weihalwei on February 7. There was nothing whatsoever in the telegram published in the Times on the 8th but what was indicated in the despatches received by us. You are doubtless aware that every news agency cables in the most condensed form, and that the necessary words are added to give the message a readable and connected form before being circulated for publication." The telegram, as sent us by the Central News, contained 655 words (azelusive of date, address, and double words). More than two thirds of the message was, therefore, admittedly manufactured in London. Under these circumstances we can only publish the statement as made in the Kobe Chronicle, and allow our readers to form their own conclusion as to the value of a telegram which we much regret having been led by misrepresentation to publish. We have only added the number of words in each paragraph to show the exact amount of expansion. Here follow the article from the Kobe Chronicle and the telegrams as alleged to have been sent and as

Mr. John Moore, Manager of the Central News, replied as follows :— Your statement to day in reference to the Central News is based upon a tissue of fabrications. It is natural for the Kobe Chronicle, acting as it does for a rival agency, to make these charges, which, from its geographical position, it can do with impunity. The so-called original messages as quoted by the Kobs Chronick were never receiv u by us. The Kobe Chronicle further states that these messages were sent to us by the editor or some member of the staff of the Shanghai Mercury. and quotes that paper in support of its fabrica tion. No such despatch was received from t editor of the Shanghai Mercury or any memb of his staff. The "original messages" as quot by you are a pure invention. I maintain th the condensed cabingrams of the Weihnig fight, as received by us, could not have been rendered into readable English with the use dewer words than those employed by our editor To this letter the Times appended the follo ing footnote: - The Central News have admitt that they only received "2.4 words is referen to Weibaiwei on February 7." They have on to publish these 204 words, certified by the te graph company that transmitted them, and t public will be able to judge, whether the 4 words added in London were necessary to rend the statement "into readable English." V shall willingly afford them space for this, the on possible, justification.
